AUSTRALIA'S
PRODUCT STEWARDSHIP PROGRAM
FOR RESILIENT FLOORING

Verified flooring recovery, backed by industry

Connecting leading resilient flooring suppliers with Registered Collection Points so material is returned to Australian manufacturing instead of going to landfill.

HOW TO SUPPORT RECOVERY AND RECYCLING WITH RESILOOP

This flyer shows you how to specify take-back on your next project and support responsible flooring recovery.

01

Specify in-scope products
Ask your flooring supplier which products are in-scope, or get in touch with us.

02

Request offcut collection
by a ResiLoop Collection Point (contractor/retailer) in tender and project documentation.

03

Receive recovery data
Project-specific collection data can be provided for your sustainability and ESG reporting.

ADD OFFCUT RECYCLING TO YOUR NEXT SPEC

Download the template to add suitable wording to your specifications at resiloop.org.au/specify

"Architects and specifiers have genuine power to drive circular outcomes through the choices they make at the design stage, and ResiLoop is here to support that."

RESILOOP – THE TRUSTED RECOVERY MARK BEHIND LEADING RESILIENT FLOORING BRANDS.

HOW MUCH RESILIENT FLOORING MATERIAL GOES TO LANDFILL?

60,000 tonnes
of resilient flooring goes to landfill in Australia each year.

9,000 tonnes
is offcut material — clean, well-suited to recycling, and the focus of ResiLoop's current collection.

WHAT HAPPENS TO THE MATERIAL COLLECTED BY RESILOOP?

ResiLoop delivers collected vinyl sheet and plank offcut material to our recycling partners who use it to create new products such as garden edging and decking.

Looking Ahead
ResiLoop is investing in R&D to expand collection capacity and introduce new material types including uplifted resilient flooring.

WHY CHOOSE RESILOOP

- **Project data.** Collection data for project-level sustainability reporting.
- **Australian supply chain.** Local recovery, local reprocessing, local manufacturing.
- **Industry-backed.** ACCC-authorised to 2030 and supported by leading flooring suppliers.
- **Industry backed. Industry funded.** A levy on in-scope products funds the scheme operations and helps reduce waste disposal fees.
